Washington, D.C. 20231

DOCKETED

Transmitted herewith for filing under 35 U.S.C. 111(a) and 37 C.F.R. 1.53(b) is a new utility patent application for an invention entitled:

METHOD AND APPARATUS FOR QUEUE MODELING

and invented by:

Victor Firoiu
Marty Borden

If a CONTINUATION APPLICATION, check appropriate box and supply the requisite information:

☐ Continuation ☐ Divisional ☐ Continuation-In-part (CIP) of prior application No.: _____

Which is a:

☐ Continuation ☐ Divisional ☐ Continuation-In-part (CIP) of prior application No.: _____

Which is a:

☐ Continuation ☐ Divisional ☐ Continuation-In-part (CIP) of prior application No.: _____

Enclosed are:

Application Elements

1. ☐ Filing fee as calculated and transmitted as described below
2. ☒ Specification having 34 pages and including the following:
 - a. ☒ Descriptive Title of the Invention
 - b. ☒ Cross References to Related Applications (if applicable)
 - c. ☐ Statement Regarding Federally-sponsored Research/Development (if applicable)
 - d. ☐ Reference to Microfiche Appendix (if applicable)
 - e. ☒ Background of the Invention
 - f. ☒ Brief Summary of the Invention
 - g. ☒ Brief Description of the Drawings (if drawings filed)
 - h. ☒ Detailed Description
 - i. ☒ Claim(s) as Classified Below
 - j. ☒ Abstract of the Disclosure

NOTICE TO FILE MISSING PARTS OF NONPROVISIONAL APPLICATION

FILED UNDER 37 CFR 1.53(b)

Filing Date Granted

An application number and filing date have been accorded to this application. The item(s) indicated below, however, are missing. Applicant is given TWO MONTHS from the date of this Notice within which to file all required items and pay any fees required below to avoid abandonment. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

- The statutory basic filing fee is missing.
Applicant must submit \$ 690 to complete the basic filing fee and/or file a small entity statement claiming such status (37 CFR 1.27).
- Total additional claim fee(s) for this application is \$3324.
 - \$1296 for 72 total claims over 20.
 - \$2028 for 26 independent claims over 3 .
- The oath or declaration is unsigned.
- To avoid abandonment, a late filing fee or oath or declaration surcharge as set forth in 37 CFR 1.16(e) of \$130 for a non-small entity, must be submitted with the missing items identified in this letter.
- **The balance due by applicant is \$ 4144.**

A copy of this notice MUST be returned with the reply.

Re: U.S. Patent Application for **METHOD & APPARATUS FOR
QUEUE MODELING**

Your Ref: BA0456

Our File: 2204/196

Dear Mr. Borden:

We have received our return postcard from the Patent and Trademark Office (PTO) relating to the above-referenced patent application. Enclosed is a copy of our return postcard for your records.

The PTO date stamp shows that the application was received on May 25, 2000, and was tentatively assigned serial number 09/579,169.

In order to obtain the earliest possible filing date, the application was submitted without an executed Declaration. Therefore, we must now fulfill the filing requirements of the PTO. Accordingly, we request signatures on various documents. Please have the enclosed documents executed as follows:

1. Combined Declaration and Power of Attorney. Each inventor should sign and date this document where indicated.
2. Assignment. This document conveys the rights of the above invention from the inventors to Nortel Networks Limited. Each inventor should sign and date this document.

I would appreciate receiving the Declaration and Power of Attorney and Assignment before

July 25, 2000

Marty Borden
June 30, 2000
Page 2

so that we may complete the filing requirements of the PTO without an additional expense for an extension of time. Once we have received the signed documents from you, we will file them with the PTO, and assuming that no problems are encountered, we can expect to receive a formal filing receipt in due course.

We remind you at this time that an applicant is under a strict duty of candor and good faith. As part of this duty, an applicant is obliged to disclose to the PTO any and all information of which the applicant is aware that is material to the examination of the application. Such information is considered material where "there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent." 37 C.F.R. §1.56(a).

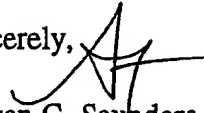

One means for complying with this duty of disclosure is the so called "Information Disclosure Statement." An information disclosure statement is a listing of patents, publications, or other information, together with an explanation of the relevance of each listed item, together with copies and translations of listed items, as appropriate. Ideally, an information disclosure statement should be filed with the application. However, an information disclosure statement can also be filed within the later of three months after the filing date of the application or before the first office action is issued. Of course, if the applicant becomes aware of any relevant art at any point during the prosecution, it is appropriate to file an information disclosure statement at that time as well.

Therefore, if you are aware of any relevant art, including relevant articles, patents, or other publications (or events such as offering for sale or public use of a product embodying the invention more than one year before the effective filing date of the application), please send us copies of these documents (or information concerning these events) at your earliest convenience so that we may comply with the duty of disclosure. For example, you may have uncovered such documents while researching the subject matter to be patented, or conducting novelty or clearance searches. Also, such documents often turn up during the course of prosecution of a related case in a foreign jurisdiction. If there is any question as to whether or not a particular document or event is relevant, it is advisable to disclose that document or event to the PTO in order to avoid any possible allegation of fraudulent or inequitable conduct, and to strengthen any patent ultimately issuing on the application.

Marty Borden

Marty,

You were named as an inventor on a patent application that was prepared by our law firm. We sent two documents that require your signature to your home address, specifically a combined declaration and power of attorney and an assignment. To date, we have not received the executed documents from you. We recently sent you a reminder. Would you please contact me at (617) 443-9292 so we can discuss this matter further. I prefer not to send any information that would identify the patent application by email.

Thank you.

Jeff

Re: U.S. Patent Application for **Method and Apparatus for Queue Modeling**
Your File: BA0456
Our File: 2204/196

Dear Mr. Borden:

We have received our return postcard from the U.S. Patent and Trademark Office (USPTO) relating to the above-referenced patent application. Enclosed for your review is a copy of the return postcard and a copy of the patent application as filed. Also enclosed is a combined Declaration and Power of Attorney and an Assignment.

The USPTO date stamp shows that the application was received on May 25, 2000, and was tentatively assigned serial number 09/579,169.

In order to obtain the earliest possible filing date, the patent application was submitted without an executed Declaration and Power of Attorney. The Declaration is essentially a statement by you that (1) you have read the patent application; (2) you understand the contents of the patent application, including the claims; (3) the patent application correctly describes your invention and the best mode known to you for making and using the invention as of the filing date; (4) you believe that you are an actual inventor of the invention as represented by at least one of the claims; and (5) you acknowledge the duty to disclose all information known to you that may be material to patentability as discussed below. The Power of Attorney enables the named attorneys and agents to prosecute the patent application and transact business with the USPTO as needed to prosecute the patent application. We need to file a fully executed Declaration and Power of Attorney for each inventor in order for the PTO to continue processing the patent

Marty Borden
October 17, 2000
Page 2

application. Therefore, please read the patent application, paying particular attention to the claims. If you are satisfied that you understand the contents of the patent application, the patent application correctly describes your invention and the best mode known to you for making and using the invention, and you believe yourself to be an actual inventor, then please execute the Declaration and Power of Attorney by signing and dating the combined Declaration and Power of Attorney at the space provided. If you have any questions or concerns, then please do not execute the combined Declaration and Power of Attorney, and instead please contact me at the telephone number listed above so we can resolve any issues. Also, please contact me if you believe that someone is incorrectly listed as an inventor or someone has been omitted as an inventor so that we can provide the correct inventorship information to the USPTO.

In addition, we need to record an assignment in the USPTO. The enclosed Assignment conveys your rights in the invention to Nortel Networks Limited. Please execute the Assignment by signing and dating the Assignment at the space provided. **THERE IS NO NEED TO HAVE THE ASSIGNMENT NOTARIZED.**

I would appreciate receiving the Declaration and Power of Attorney and Assignment before

November 15, 2000

so that we may complete the filing requirements of the USPTO without an additional expense for an extension of time. Once we have received the signed documents from you, we will file them with the USPTO, and assuming that no problems are encountered, we can expect to receive a formal filing receipt in due course.

We remind you at this time that an applicant is under a strict duty of candor and good faith. As part of this duty, an applicant is obliged to disclose to the USPTO any and all information of which the applicant is aware that is material to the examination of the application. Such information is considered material where "there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent." 37 C.F.R. §1.56(a).

One means for complying with this duty of disclosure is the so called "Information Disclosure Statement." An information disclosure statement is a listing of patents, publications, or other information, together with an explanation of the relevance of each listed item, together with copies and translations of listed items, as appropriate. Ideally, an information disclosure statement should be filed with the application. However, an information disclosure statement can also be filed within the later of three months after the filing date of the application or before the first office action is issued. Of course, if the applicant becomes aware of any relevant art at

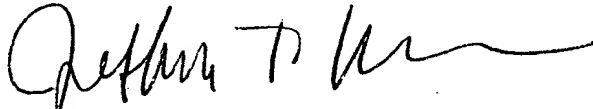

Marty Borden
October 17, 2000
Page 3

any point during the prosecution, it is appropriate to file an information disclosure statement at that time as well.

Therefore, if you are aware of any relevant art, including relevant articles, patents, or other publications (or events such as offering for sale or public use of a product embodying the invention more than one year before the effective filing date of the application), please send us copies of these documents (or information concerning these events) at your earliest convenience so that we may comply with the duty of disclosure. For example, you may have uncovered such documents while researching the subject matter to be patented, or conducting novelty or clearance searches. Also, such documents often turn up during the course of prosecution of a related case in a foreign jurisdiction. If there is any question as to whether or not a particular document or event is relevant, it is advisable to disclose that document or event to the USPTO in order to avoid any possible allegation of fraudulent or inequitable conduct, and to strengthen any patent ultimately issuing on the application.

Thank you for your attention to this matter. Please feel free to call me if you have any questions or comments.

Very truly yours,

A handwritten signature in black ink, appearing to read "Jeffrey T. Klayman", with a long horizontal flourish extending to the right.

Jeffrey T. Klayman
